

Developer with **2.5 years of experience** in client-based and product-based companies, specialising in JavaScript, TypeScript, and modern frameworks. Expert in the **MERN stack (React, Next.js, Node.js, MongoDB)**, scalable applications, third-party integrations, and writing clean, high-performance code.

## SKILLS SUMMARY

- **Programming Languages:** JavaScript, TypeScript
- **Frontend Development:** React.js, Next.js, HTML5, CSS3, Media Queries, Redux, Tailwind CSS, Bootstrap, Shadcn UI, MUI, RESTful APIs, TanStack Query
- **Backend Development:** Node.js, Express.js, MongoDB, SQL, CouchDB, Firebase, Prisma, Sequelize
- **DevOps & Deployment:** Git, VPS, Nginx, AWS EC2, DigitalOcean Droplet
- **Payment Integrations:** Stripe, Razorpay, MetaMask, PayPal
- **Authentication & Security:** Clerk, NextAuth, Iron-Session
- **Soft Skills:** Problem-Solving, Critical Thinking, Continuous Learning & Adaptability, Effective Communication & Team Collaboration

## WORK EXPERIENCE

### MERN Developer | Susamp Infotech | 1y 3m

Jan 2024 – March 2025

- Enhanced server **cost efficiency by 40% using caching and reduced deployment rework by 50%** using CI/CD pipelines.
- Architected & deployed a **SaaS platform, supporting 10,000+ users**, improving performance by 40%.
- Sole developer responsible for the company's **entire web project portfolio** across multiple technologies, including React.js, Node.js, Next.js, and WordPress.
- Planned and **developed 50+ APIs** for web and mobile applications, ensuring scalability and security.
- Integrated **payment gateways** such as Stripe and Razor pay to enhance application monetisation.
- Managed cloud infrastructure, deploying applications on DigitalOcean Droplets.

### Next JS Developer | Rain Infotech | 1y 3m

Oct 2022 – Jan 2024

- Managed project timelines efficiently, improving project delivery time by 30%.
- **Developed and delivered 15+ projects** for diverse clients **using React.js and Node.js**.
- Explored and implemented **Web3 technologies**, including blockchain and MetaMask wallet integration.
- Gained proficiency in backend development through self-learning and mentorship, **managing full-stack applications**.
- Built and maintained scalable APIs in Next.js to support web and mobile applications.
- Optimized web app performance with Server-side Rendering (**SSR**) and Static Site Generation (**SSG**)

## EDUCATION

### Bachelor of Computer Applications

2022-2024

Bhagwan Mahavir University, Surat

- Specialisation in **Web Development & Databases**.
- Led a 3-person dev team to build and present a full-stack project, securing the **#1 rank among 30 teams**. Created scalable architecture, **handled backend & frontend**, and delivered a standout presentation.

## PROJECTS

### Money Plant

<https://rudr.tech/project/moneyplant>

Referral app with commissions on direct & indirect invites.

- MLM referral system with dynamic tree structures and automated payouts.
- Engineered **complex backend**, **tree algorithms**, **analytics** with MongoDB, and PayPal payments.

### BallByBall

<https://rudr.tech/project/ballbyball>

Cricket Scorer app

- Cricket scorer app with team management, player stats, and live score tracking.
- Designed to make scoring faster, more intuitive, and tailored for everyday players.

### WebStickies

<https://rudr.tech/project/webstickies>

- Referral app offering commissions on direct and indirect invites.
- A **Chrome extension** that allows users to save notes on specific websites for instant recall.
- Designed for efficiency, enabling seamless note-taking without cloud storage or clutter.

### GPS Map Camera Enterprise

<https://login.gpsmapcamera.com>

- Led **end-to-end development** as the sole developer at **Susamp Infotech**, delivered a fully functional SaaS application.
- Designed and implemented multiple APIs to integrate seamlessly with various software, enabling a connected software ecosystem.
- Built a complete SaaS platform, including **license management** and **payment handling via Razorpay** for multiple **subscription plans**.

## CERTIFICATES

### Legacy JavaScript Algorithms and Data Structures
